	- : ASSIGNMENT 01 :-
-	Task o1:-
	Android is updated almost every year.
	Each version adds new features,
	improves performance, and makes the
	system more secure.
	Comparative Analysis of recent 3 versions:
	Android 13:~
	Released 2022.
	Main Focus: Personalization and Privacy
- 11	Allowed users to set different
	languages for different apps.
	Extended the "Material You" theme
	so that colors from the wallpaper
	applied to all apps.
	New media permissions - apps could
	only access selected photos or
	videos instead of entire gallery.
•	Nearby WIFI Devices Permission -> separates
	WIFI and GiPs permission for
- 11	better privacy.
	Tablets - & - Large Screen: - Improved
	support for Large Screens, tablets,
- 1	and foldable devices. Improved multitasking

•	Theft Detection Lock: locks the	
	device automatically, if it senses theft.	
	Private Space: - hidden space for	
	sensitive apps with separate authentication.	
	Multitasking Improvements: taskbar pinning	
	app pairing, and Spitt - screen shortcuts	
	for tablets.	
•	Camera and Media: Low-Light Boost	
	le Improved in app comera controls-	
	especially useful for photography.	
	Predicitive back gestures by default-	
	previews the previous screen on	
	hack owige.	
•	Additional UI and Security Features:	
	adaptive vibration, default wallet app	
	selection, shutdown and volume haptics,	
	satellite messaging, USB lockdown, and	
	edge to edge display.	
••	Task 02:~	
	Expect from new operating System:	
	I expect :-	
	Faster performance with less battery	
	consumptions.	
	More AI - integration to simplify daily	
	tasks.	
	Enhanced security and privacy features	
	to protect personal data.

REAL OF PER	The Sale Sale Sale Sale Sale Sale Sale Sal
•	A smoother user experience, free from
1	unneccessary bloatware.
•	Advanced device protection: the os
	Should have the ability to locate
	my device instantly if it it is
	lost or stolen.
	Task 03:~
	Reasons of Windows 8 Failure:
	Removed the Start Menu: - The Familiar
	Start menu was replaced with the new
	Start Screen (Metro UI). Confusing UI
	Designed For Touch, NOT FOR PC USERs:-
	Poor App Store:
	Compatibility Issues:
	Negative First Impression:
•	Lack of App Ecognistion
	Task 04:-
	Reasons of Windows Phone Failure:
•	App Grap (Biggest Reason) Popular Apps like
	Instagram, Snapchat, Youtube and many banking
	apps were eiether missing or outdated version
	Poor Marketing and Branding.
	Late to Market.
	Weak Support from Monufactures: Only
	Nokia (Later Microsoft Lumia) fully
	supported it other big brands like
